PRUDHVI RAJ P J

Sr UX/UI Designer | Experience Strategy | Design Thinking

+91 9177598417 | prudhviuxer@gmail.com | Behance | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

UX/UI designer with 10+ years of hands-on experience and 100+ projects designing enterprise web and mobile applications for healthcare, banking, telecom, logistics and e-commerce clients. I focus on understanding users and the business problem first, through interviews (100+ conducted), usability sessions and product data, and then make that understanding visible to the team as journey maps, information architecture and user flows before any UI work starts in Figma. Comfortable owning a product area end to end with minimal oversight, from discovery and design through developer handoff and post-launch measurement. Accessibility (WCAG 2.1) and measurable outcomes are part of how I judge whether a design is finished. I have run 30+ design thinking workshops with clients, including on-site sessions in Singapore and Riyadh, and I have built AI agents for usability evaluation and user research. Results include an 18% increase in product adoption, 30% fewer identified user pain points and 25% faster design-to-development handoff.

CORE COMPETENCIES

► Enterprise Web & Mobile UX	► Figma: UI, Prototyping & Design Systems
► Problem Framing & Discovery	► User Research & Usability Testing
► Journey Maps & Empathy Maps	► Information Architecture & User Flows
► Interaction Design & High-Fidelity UI	► Wireframing & Rapid Prototyping
► Accessibility & WCAG 2.1	► UX Metrics, KPIs & A/B Testing
► Heuristic Evaluation & UX Reviews	► Design Thinking Workshops
► Product Ownership & Roadmap Input	► Stakeholder Alignment & Storytelling
► Agile / Lean UX / Scrum	► Mentoring & Design Critiques

WORK EXPERIENCE

UX Manager

Apr 2024 - Present

Tech Mahindra Limited (BORN) | Hyderabad, India

- Work as the hands-on lead designer on complex web applications and own the design from discovery to release: information architecture, interaction design, low and high-fidelity prototypes in Figma, and UX review checkpoints with the development team.
- Start each engagement by framing the problem before proposing anything. I run stakeholder interviews and user sessions (100+ interviews to date) and go through support tickets and analytics (Hotjar, Google Analytics) to separate symptoms from root causes.
- Turn research into shared artifacts such as journey maps, IA diagrams and user flows, so product, engineering and business teams agree on the problem and the priorities before design work begins.
- Set UX KPIs and OKRs for each engagement and track them after launch, then use the numbers to decide what to fix or iterate on next.
- Built and maintain component-based design systems in Figma, which, together with a tighter Agile workflow, cut design-to-development handoff time by 25%.

- Designed AI chatbot interfaces and conversational flows for several clients, reworking dialogue patterns and information architecture to improve user engagement.
- Built AI agents for UX work: a usability agent that evaluates UI designs against Nielsen's 10 usability heuristics, and a research agent (Anthropic API) that conducts AI-driven user interviews and generates structured insight reports.
- Have run 30+ design thinking workshops and co-creation sessions with clients and senior stakeholders, including on-site workshops in Singapore for the Singapore Land Authority and in Riyadh for the Saudi Esports Federation, and keep them updated on UX progress and metrics. Client satisfaction has stayed above 80%.
- Mentor a team of 18 designers and researchers through design critiques and 1:1s, and set the UX standards, templates and WCAG accessibility checks the team works to.

UX Lead

Apr 2022 - Mar 2024

Tech Mahindra Limited (BORN) | Hyderabad, India

- Owned UX design and strategy for 70+ RFP submissions. Reworked product flows using journey mapping and iterative prototyping, which improved product adoption by 18%.
- Set up component-based design systems in Figma that made designs more consistent and shortened UI development time across client engagements.
- Made A/B testing and heuristic evaluations a regular part of delivery, which reduced identified user pain points by 30%.
- Wrote the WCAG accessibility guidelines applied to every product deliverable.
- Mentored junior and mid-level designers through weekly design critiques and a structured onboarding programme.
- Introduced customer journey mapping and design thinking frameworks and turned them into repeatable standards for the team, along with shared UX templates.

Senior UX Designer

Jan 2020 - Mar 2022

Tech Mahindra Limited (BORN) | Hyderabad, India

- Designed products end to end, from research and IA through interaction design, prototyping and rollout, for clients including Mayo Clinic, Standard Chartered, Citi Bank, WHO, DP World, MTN, Mahindra Racing and Tata IPL.
- Implemented design systems and applied WCAG 2.1 accessibility standards across the web and mobile products we delivered.
- Ran user research, usability tests and heuristic evaluations, and turned the findings into recommendations that were taken into product roadmaps.
- Created wireframes, interactive prototypes and high-fidelity designs in Figma and Adobe XD.

Senior UX/UI Designer & Developer

Mar 2017 - Jan 2020

Medley Medical Solutions | Hyderabad, India

- Designed UX/UI for a healthcare ecosystem of 10+ products, including patient B2C portals, B2B clinical platforms, ERP systems, logistics apps and consumer mobile apps.
- Led user research, competitive analysis, empathy mapping and customer journey mapping, and validated designs through benchmark and GUI usability testing.
- Introduced accessibility best practices and built rapid prototypes in Ionic, which helped close the gap between design and front-end development.

Senior UI Designer & Developer

Dec 2015 - Feb 2017

We Simplify (VREMIND) | Hyderabad, India

- Led the design process for a health startup at T-Hub, from stakeholder interviews and wireframes to interactive prototypes and front-end build (HTML/CSS/JavaScript).

UI Designer

Nov 2014 - Dec 2015

Efficient Electricals Online Solutions | Hyderabad, India

- Designed and developed websites and mobile apps for an e-commerce startup, handling each project from requirements gathering through delivery.

TOOLS & TECHNOLOGY

Design Tools	Figma (Expert), Sketch, Adobe XD, Adobe Photoshop, Adobe Illustrator, Axure RP, Balsamiq

Design Systems	Figma Component Libraries, Design Tokens, Atomic Design
Methodologies	Design Thinking, Human-Centered Design, Accessibility (WCAG 2.1), Design Sprint, Agile, Lean UX, Scrum, Kanban
Research	User Interviews, Usability Testing, A/B Testing, Heuristic Evaluation, Empathy Mapping, Customer Journey Mapping, Information Architecture
Analytics	Hotjar, Google Analytics
Development	HTML, CSS, JavaScript, Ionic Framework
Domains	Healthcare, Banking & Finance, Telecom, Data Privacy, Enterprise SaaS, E-commerce (B2C/B2B), Logistics, Government, Sports & Esports, AI

EDUCATION

Bachelor of Science in Computer Science

Sri Sai Chaitanya Degree College, Acharya Nagarjuna University | *2010 - 2013*

Diploma in Web Designing

Pixxel Arts | *2013*

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- AI Agents for Product Leaders, LinkedIn Learning (2025)
- Introduction to Behavioural Science, Udemy (2025)
- Design Thinking, NPTEL, IIT Madras (Premier Certification) (2019)
- Rapid Prototyping User Experience, Udemy (2019)
- Design Thinking for Entrepreneurs & Startups, Udemy (2019)

AWARDS & RECOGNITION

- Standing Ovation, Pat on Back & Bravo Awards, Tech Mahindra (2020-2026)
- Best Performer Award, Medley Medical Solutions Pvt Ltd (2018)

NOTABLE CLIENTS

Tata IPL • BCCI • Mahindra Racing • MTN • World Health Organization (WHO) • DP World • Singapore Land Authority • Australian Unity • Mayo Clinic • Standard Chartered • Citi Bank • Allcargo Gati
